

LiveContent v6.2.1 released!

05 June 2026

I am pleased to announce LiveContent 6.2.1 is available for download upon request from [RWS Customer Support](#).

LiveContent v6.2.1 includes recent security updates and the following improvements:

- Improved Linux installation workflow with service user model and clearer privilege handling
- Digitally signed Windows binaries to strengthen security and system trust
- Easier IETM launching on Linux, allowing end users without admin rights to start IETPs
- Expanded platform support, including Red Hat Enterprise Linux 8.10
- Updated support for latest Firefox ESR, Chrome, and Edge browsers

Visit [LiveContent 6.2 Release Notes](#) for more details on what's new in version 6.2.1

The current product release status is found here: [Contenta Publishing Suite Product Version Release Status](#).

If you have questions, please open a support ticket at [RWS Customer Support](#).
